and passion for service that our **TEAM**  
delivers are beyond compare.

We look forward to serving you today!

**CONCENTRIC  
SECURITY** LLC

*“for Building Confidence™”*

**Concentric Security, LLC** is one of the nation’s foremost **Perimeter Security Construction Companies** for homeland security and force protection applications. We specialize in turn-key projects for commercial and government clients nationwide.

Concentric Security specializes in **turn-key projects for the Department of Defense, federal, state and local governments and commercial customers nationwide**. Our professionals are trained and knowledgeable in the Unified Facilities Criteria (UFC) for security engineering, the Army Access Control Points Standard Definitive Design, and the Military Surface Deployment and Distribution Command Transportation Engineering Agency (SDDCTEA) Pamphlet 55-15, “Traffic and Safety Engineering for Better Entry Control Facilities.”

Our ability to provide our customers a turn-key solution arises out of five core strengths:

- Concentric Security specializes in one area – **Perimeter Security Construction** - this allows us to concentrate on specific, recognizable problems and work hand-in-hand with our customers.
- Concentric Security can provide a **single point for planning, engineering, implementing and program managing** viable perimeter security solutions including **Access Control Points (ACPs)** that provide our customers a value that few companies can match.
- Concentric Security’s professional staff is composed of seasoned veterans in the security industry that have been involved in both security design and construction. Many of our **construction project managers, design engineers, control engineers, and professional engineers (PE)** are also board certified **Physical Security Professionals (PSP)**.
- Concentric Security has **strong relationships with product and service providers** that share our vision of exceeding our customers' expectations while providing industry leading, **state-of-the-art physical security technologies**.
- Concentric Security holds one of the most comprehensive **GSA Federal Supply Schedule (GS-07F-0100M) dedicated to force protection and homeland security solutions**, allowing us to provide turn-key solutions that can begin with design/engineering services and extend through product supply, installation, service and warranty.

Planning, security engineering and constructing turn-key access control points and entry control facilities, including:

- |                                       |                                  |
|---------------------------------------|----------------------------------|
| ○ Active and Passive Vehicle Barriers | ○ Controls                       |
| ○ Anti-Ram and Anti-Climb Fencing     | ○ Blast and Hazard Mitigation    |
| ○ Architectural Pre-Cast Concrete     | ○ Technology Comparison/Analysis |
| ○ Ballistic Rated Guard Booths        | ○ Perimeter Site Assessments     |
| ○ ID Check Canopies                   | ○ Product Installation           |
