

Concentric Security Services

Concentric Security provides a single point of contact for Assessments, Consulting, Training, Maintenance and Constructing turn-key security solutions. The services offered provide a comprehensive, customized package that provides our customers with a complete security solution to support any unique security project’s needs.

Consulting

Concentric Security Consulting provides a wide range of services to support an existing facility, potential leased facility or new facility design. Our team of security experts can assist you in meeting Federal and commercially mandated standards and guidelines, providing appropriate security recommendations to comply with the standards and to address site specific issues for a fully-functional security system solution.

Assessments

Our team is available to assist in assessing the requirements of a new project or the current conditions of an existing site. Concentric Security has the knowledge and capability to review unique site requirements and the experience to satisfy your needs throughout this process.

Construction

Concentric Security construction services includes installation of equipment and controls, controls upgrades and retrofits, integration of multiple systems and complete ACP/ECF construction. Our personnel are trained and certified by all major equipment providers allowing our team to anticipate and address challenges before installation and construction. Concentric Security provides custom controls and unique theories of operation to fit site specific needs and sound security principles.

Maintenance

Our professional, knowledgeable and experienced team of field supervisors and service technicians stands ready to maintain and service your vehicle barriers. Concentric Security's focus is on servicing and maintaining vehicle barriers, acting as the final point of denial in the event of a physical attack.

Training

Training is a critical component of any balanced security system and is often treated as a one-time event at the commissioning of a new system. To be successful, training must take place throughout the life of a security system and throughout the life of the individuals running the system. Concentric Security will assist your organization in implementing and maintaining your training program. We offer training in maintenance, troubleshooting, theory of operations and operations.

We look forward to serving you!
