

CONCENTRIC SECURITY LLC
“for Building Confidence™”

Concentric Security, LLC and RSA Protective Technologies proudly announce Surface Mount Bollard Systems to meet your requirements for flexible and non-permanent perimeter security.

- Flexibility for movable or non-permanent security
 - Fill with sand or concrete to provide weight
- Engineered to either K4 or K12 rating
 - Four bollard arrays with a 12 bollard minimum to achieve a K4 rating
 - Three bollard arrays with a 12 bollard minimum to achieve a K12 rating
 - K4 system is 7" high, closely mirroring a standard step
 - K12 system is 12" high
- Deployable in hours
 - No field welding necessary
 - No excavation required
 - No ground connection needed
 - Easily assembled on site
- Modular for flexibility in configuration to most any site condition
 - Pedestrian walkthrough areas and holes to allow fence to be added are available
 - End of each run requires a weighted end component to secure the array
 - Walk through connector plate maintains spacing at 42" for ADA compliance
 - Standard bollard spacing is 48" clear opening
 - Angles of both 45 and 90 degrees available

Great for:

Event security
Leased facilities
Street closures
Barrier plans

Available on **GSA Schedule** soon
