

TB100 Portable Bollards

Temporary barriers to protect your guests and critical infrastructure

Quickly block access to temporary venues with this portable barrier system - TB100 Portable Bollards. Individual bollards can be used as vehicle mitigation in walkways, roadways and other areas where vehicles could gain access. Great temporary solution to protect events with public access such as parades, festivals, sporting events.

- Set in place without excavation or anchoring
- Use individually or link together up to 5 portable bollards with a cable system to obtain a rating
- ASTM M30, P3 Rating - Stops and disables 15,000 pound vehicle traveling 30 mph
- Takes a hit from any direction
- Custom Colors available to blend into surroundings
