

Concentric Security is proud to offer two comprehensive physical security fence systems designed to help protect your facility while maintaining an aesthetically pleasing appearance. Security fencing will help assist to restrict personnel from accessing sensitive areas and affords a much greater level of security than conventional chainlink fences.

All Concentric Security fences are constructed of high strength rolled steel that is galvanized and coated using an 11 stage coating process (PermaCoat™) to ensure the highest level of protection from corrosion.

With a multitude of available styles, sizes, and options available, Concentric Security fence systems can be constructed to meet virtually any perimeter security requirements. All materials, installation, and maintenance for our fencing systems can be purchased directly from our comprehensive GSA schedule.

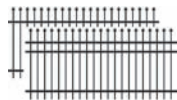

AEGIS II

- 10 YEAR WARRANTY
- EASY INSTALLATION
