

VEHICLE BARRIERS

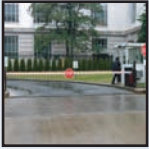

**CONCENTRIC
SECURITY** LLC

www.concentricsecurity.com

Concentric Security offers a full line of vehicle barriers suitable for virtually any vehicular access control application.

Our crash rated vehicle barrier systems include plate barriers, beam barriers, bollards and gates. These barriers range from K1.1 equivalent to K12 crash ratings and may be used in conjunction with existing controllers, card readers and sensors. We also have a wide assortment of safety and vehicle detection accessories available. As with all Concentric Security products, installation, testing and maintenance are also available from our GSA schedule.

BOLLARDS

Features:

- TESTED AND CERTIFIED
- CORROSION PROTECTION
- RETRACTABLE
- REMOVEABLE
- LOW MAINTENANCE
- LONG SERVICE LIFE

Concentric Security steel bollards are the perfect solution for controlling vehicular access to your site or establishing vehicular stand off zones while permitting personnel access.

Our steel bollards have been certified by the Department of State and achieved a K8 tested crash rating. They are available in fixed, semi-automatic and automatic configurations. Fixed bollards are permanent solutions designed for establishing permanent stand-off distances. Our Semi Automatic bollards are designed for easy deployment in infrequent use situations. And our automatic bollards are designed to withstand frequent use, even in harsh weather.

CRASH BEAM BARRIERS

Features:

- TESTED AND CERTIFIED
- CORROSION PROTECTION
- EASY INSTALLATION
- LOW MAINTENANCE
- LONG SERVICE LIFE

Concentric Security offers numerous types of tested crash beam barriers for a variety of applications. They have been tested and certified to stop a 10,000 pound vehicle traveling at 18 miles per hour.

Our hydraulic, manual and portable barriers may be sized to fit any roadway between 12 and 28 feet wide. All moving parts are located above ground and easily accessible for maintenance. They are designed for medium traffic control and built to withstand years of use.

CANTILEVERED CRASH BARRIERS

Features:

- TESTED AND CERTIFIED
- CORROSION PROTECTION
- FORTIFIED APPEARANCE
- PERSONNEL BARRIER
- LOW MAINTENANCE
- LONG SERVICE LIFE

Concentric Security offers sliding gate and sliding beam barriers to meet your perimeter access requirements. Both types have been crash tested and certified to Department of State requirements (K4-K12). These barriers require no roadway hardware and are designed for operation in any environment.

Our gates are constructed to allow for frequent operation and easy maintenance. Constructed of high quality steel, they will provide years of trouble free operation.

PLATE BARRIERS

Features:

- TESTED AND CERTIFIED
- CORROSION PROTECTION
- MINIMAL / NO EXCAVATION
- FREQUENT USE
- LOW MAINTENANCE
- LONG SERVICE LIFE

Concentric Security plate barriers are available as shallow mounted, surface mounted and portable models. They are each available in custom widths to fit your specific requirement. These barriers are hydraulically operated and may be controlled either locally or remotely. All of our plate barriers are constructed of high strength steel and powder coated for maximum corrosion resistance.
